

FixtoFlip is Different

Unlike other "flipping" resources which provide you with "secret" strategies and "creative" financing options, FixtoFlip offers you strategies to not only Fix and Flip successfully, but to help you decide **BEFORE** you buy if the property is worth the investment. Our proprietary evaluation system provides you with access to expert tools for a fraction of the cost.

FixtoFlip.com understands what it takes to flip houses. You need to locate a fixer upper property, tools and resources and forge partnerships with the right service providers who have the skills you are not experienced in and can help you through the burden of those tasks.

To be successful, you must be willing to leverage other experts. There are tons of talented resources at your disposal. For example, you might have the funds to purchase the house and even pay for the rehab, but might not have the working experience and skills in doing the construction work. A General Contractor could offer his services to help manage the rehab of the flip. Or, you have problems finding a good property to flip. Then I would leverage the FixtoFlip Listings and forge a relationship with a Realtor to help you in evaluating properties in your area.

The bottom line to be successful in flipping you need three things, the right property, the tools and resource for evaluating the flip, and the right partners to make your Flip Team Whole. FixtoFlip provide you access to all three!
